 - Scientific data presented must be original and not yet published elsewhere.
 - Photos, mono figures and other images and references should not be used.
 - *Scientific abstract* text **should** be divided into the following sections:
 - objectives, methods,
 - results,
 - conclusions (**a background section can also be included**).
 - *Clinical abstract* text :
 - (Thus, the theme is intended to embrace the contributions of both our clinicians and researchers. Every clinician in our society has clinical cases that are worthy of study. We invite all clinicians to consider presenting one or more of their most interesting and challenging cases and reporting on both the process and outcome of therapy. The general clinical importance of the case study must be pointed out in the abstract.
-
- Generic (not trade) names for drugs should be used and written in full (not denoted by initials).
 - Dosing regimens should be written in full. For example, TID should be written as three times daily.
 - Only original and unpublished abstracts in English shall be accepted.
